**Item 8.01. Other Events.**

Aircom Pacific, Inc. ("Aircom"), the wholly owned operating subsidiary of Aerkomm Inc. ("Aerkomm"), recently entered into a non-binding cooperation agreement with Telesat Leo Inc. ("Telesat"), a wholly owned subsidiary of Telesat Canada, to jointly collaborate to develop a test program for the Telesat low-Earth-orbit (LEO) Network based on the Aerkomm inflight entertainment and connectivity platform.

The cooperation agreement between Aircom and Telesat is preliminary and nonbinding and subject to the negotiation and execution of a definitive agreement. Aerkomm expects that a definitive agreement will be signed, although there can be no assurance when this will happen, if at all.

On June 26, 2020, Aerkomm issued a press release announcing the cooperation agreement, a copy of which is filed herewith as Exhibit 99.1.

Aerkomm Inc. Announces Cooperation with Telesat

Jun 26, 2020, 07:30 ET

FREMONT, Calif., June 26, 2020 /PRNewswire/ -- Aerkomm Inc. ("Aerkomm" or "the Company") (Euronext Paris: AKOM;OTCQX: AKOM), a development stage service provider of In-Flight Entertainment and Connectivity solutions for the airline industry, today announced that its wholly owned subsidiary, Aircom Pacific, Inc. ("Aircom") has entered into a cooperation agreement with Telesat Leo Inc. ("Telesat"), a wholly owned subsidiary of Telesat Canada. Telesat has grown to be one of the largest and most successful satellite operators providing critical connectivity solutions that tackle the world's most complex communications challenges, providing powerful advantages that improve their operations and drive growth.

Through this agreement, Aircom and Telesat will jointly collaborate to develop a test program for the Telesat low-Earth-orbit (LEO) Network, Telesat's network of low-earth orbit satellites for aircraft connectivity, to assess the technical and commercial viability of incorporating the Telesat LEO Network capacity into Aircom's portfolio and network.

Mr. Louis Giordimaina, CEO of Aerkomm, commented, "Aerkomm is pleased to enter into this cooperation agreement with Telesat. As part of our commitment to technological excellence, we have been evaluating solutions to offer next-generation capacity for our aviation connectivity platform. Our research leads us to believe that a hybrid geostationary/low-earth-orbit solution will have the ability to provide such capacity, and Telesat's LEO Network, a multi-terabit, high-throughput, low-latency open network infrastructure, is a fitting complement to our existing geostationary solution. We look forward to working with Telesat to test this industry-leading technology for commercialization, and hope to build a fruitful and long-term partnership."

Aircom and Telesat will collaborate in both technical and commercial activity. The two parties' technical collaboration includes testing network performance, leveraging Telesat's Phase 1 LEO satellite which has been in polar orbit since 2018, ensuring compatibility with existing Aircom solutions and future user terminal solutions, and end-to-end implementation within regulatory guidelines. Commercial collaboration will include optimizing business and operating models, joint presentations and information sessions with key customers and partners, and exploring a long-term joint development plan.

This cooperation agreement between Aircom and Telesat is preliminary and nonbinding and subject to the negotiation and execution of a definitive agreement. Aerkomm expects that a definitive agreement will be signed, although there can be no assurance when this will happen, if at all.
